OBJECTIVE

Computer Science graduate with hands-on experience building user-facing web applications, interactive interfaces, and AI-powered products. Experienced with Figma, UI design, responsive frontend development, user-centered workflows, and independent UX research, supported by a strong foundation in Python, React, REST APIs, databases, and AI/ML technologies. Interested in applying technical and UX skills to design simple, accessible, and intuitive experiences for diverse users and real-world use cases.

EDUCATION

B.Tech, Computer Science & Engineering Aug 2022 – June 2026
Shri Ramswaroop Memorial College of Engineering & Management, Lucknow
◦ Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Machine Learning, Deep Learning, Artificial Intelligence

Senior Secondary (Class XII) 2021 – 2022
Buddha Public School, Bahraich

SKILLS

UX / UI & Design: Figma, UI Design, UX Research, User-Centered Design, Interaction Design, Responsive Design, Accessibility, Prototyping
Frontend: React, Vite, JavaScript, HTML5, CSS3
Backend: Python, Django, Django REST Framework, Flask, FastAPI, REST APIs
AI / ML: LangChain, HuggingFace, TensorFlow, Keras, Scikit-learn, NumPy, Pandas
Databases: MongoDB, PostgreSQL, MySQL
Tools: Git, Docker, ReportLab
Professional: Communication, Team Collaboration, User-Focused Problem Solving, Requirements Understanding, Technical Documentation

EXPERIENCE

Data Science Intern Oct 2024 – Dec 2024
IBM (Remote)
◦ Executed ETL workflows using Python, Pandas, and SQL to clean, transform, validate, and prepare datasets for reliable analytics workflows.
◦ Built and evaluated machine learning models using Scikit-learn for regression, classification, and clustering tasks, applying quantitative analysis to interpret model performance.

Generative AI Virtual Internship (PBEL) Aug 2025
IBM Skills Network (Remote)
◦ Built transformer-based NLP workflows using LangChain and embedding pipelines for automated information processing and user-facing AI application workflows.
◦ Designed prompt-engineering strategies to improve the quality and consistency of LLM-generated outputs, strengthening interaction with AI-driven systems.

Data Analytics Trainee Jan 2026 – Feb 2026
Infosys Foundation – Finishing School for Employability
◦ Applied Python-based analytical techniques to real-world datasets and developed data-visualization workflows for communicating analytical findings clearly.

PROJECTS

AI MCQ Generator & Evaluation System | *Django, Django REST Framework, Python, LangChain, HuggingFace* [Live Demo](#)
◦ Designed and developed a user-facing AI assessment application that transforms uploaded documents into contextual MCQs and interactive evaluation workflows.
◦ Developed Django REST Framework workflows for question generation, evaluation, attempt tracking, and accuracy analysis, connecting backend functionality with clear user interaction flows.
◦ Integrated HuggingFace NLP models into the application to support automated assessment generation and personalized user interaction with AI-generated content.

NexaLearn – AI Learning Assistant | *Flask, Google Gemini, LangChain, FAISS, MongoDB, React* [Live Demo](#)
◦ Collaborated on an AI learning platform awarded 2nd Best Major Project in college, designed around user workflows that transform YouTube videos, PDFs, and audio into transcripts, flashcards, quizzes, and diagrams.
◦ Developed interactive full-stack workflows using React, Flask, MongoDB, Gemini, and LangChain-based RAG pipelines to connect content processing with user-facing learning experiences.
◦ Contributed to an end-to-end product experience focused on simplifying complex AI-powered learning workflows for users through structured content interactions.

MOODBOARD – Mood-based Vibe Generator | *React, Vite, CSS3* [Live Demo](#)
◦ Designed and built a responsive React interface that generates mood-based colour palettes, quotes, and curated Spotify playlists through an interactive user workflow.
◦ Focused on responsive visual presentation and intuitive interaction patterns to translate user-selected moods into personalized content and visual outputs.
◦ Applied frontend design principles using React hooks and responsive CSS to create a lightweight, user-oriented experience across screen sizes.
